

# Pyam Disinfectant for general use (1,67g NaDCC)

## Presentation:

Pyam disinfectant is sold in pots of 200 tablets.

## Use recommendations:

It is a product developed for use in industries, factories, restaurants, kitchens, canteens, public stations, bathrooms and other common areas in general.

## Applications:

The Pyam disinfection tablets were developed for its use in the disinfection of surfaces with infection risk, in a fast, precise and safe way; and for the purification of 200 liters of water for human use.

## Shelflife:

3 years.

## Advantages of this presentation:

- ◆ Easy to use tablets, stable, with precise and safe concentrations.
- ◆ It acts under disinfection procedures, validating ppm of chlorine (mg/liter).
- ◆ It can be used with anionic detergents, soaps and cleaning liquids, allowing to clean and disinfect at the same time.
- ◆ Great capacity of purification of water for human use per tablet.

## Use instructions:

Add one Tablet in the amount of liters shown according to the required chlorine ppm, and then use the solution to disinfect the surfaces with a cloth or rag.

TABLETS OF 1,67 g. NaDCC			
LEVELS	Nº TABLETS	LITERS	AVAILABLE CHLORINE (ppm)
High infection risk	4	1	4000
Medium infection risk	1	1	1000
Low infection risk	1	2	500
Water purification	1	200	5.01
